

FOR IMMEDIATE RELEASE:

Wilwood Disc Brakes Releases Aero6-DM Brake Kits for 2024-2025 Toyota Tacoma

Camarillo, CA • August 2026

Wilwood has expanded its **Aero6-DM** "Direct-Mount" bolt-on brake kit lineup by introducing kits for 2024-2025 Toyota Tacoma 2WD and 4WD trucks. Developed specifically for ease of installation, reduced cost, and upgrading the stock rotors and heavy cast-iron calipers, these kits are designed to work with most 17" and larger wheels and be fully compatible with factory master cylinders, ABS, and all electronic controls.

Forged aluminum six piston **Aerolite** front direct-mount calipers are engineered to bolt directly to the Tacoma's spindles/hubs, simplifying installation. Rotors are 13.38" x 1.26" and are available in either **GTB** slotted or **SRP** drilled and slotted. These premium vented and e-coated rotors are made from long-grain carbon iron alloy. Kits come with new Wilwood **BP-22** ceramic-based compound brake pads formulated for street-performance, off-road, or towing applications. Calipers are available in gloss red or black powder coat with 26 other color options available (additional charges apply). Stainless steel **Flexlines** and premium-grade hardware included.

Aero6-DM kits provide increased performance and repeatability with an improved pedal feel for more confident braking. Larger brake pads and vented rotors have more thermal capacity, allowing better heat dissipation for high-demand highway, off-road, hauling, and overlanding applications that many Tacoma drivers enjoy. Visit www.wilwood.com for more information.

MSRP: starts at \$2,035.08
