

FOR IMMEDIATE RELEASE:

**Wilwood Disc Brakes Releases New XRS4R Rear Big Brake Kits for Big Ford New Style 2.50" Offset
Camarillo, CA • September 2026**

Wilwood announces a new series of pre-configured rear brake kits centered around the newly released Next Evolution **XRS** high-performance X-bridge street caliper. The new sleek, modern four piston caliper design is stronger and lighter than its predecessor, the **Forged Narrow Superlite** (FNSL) radial mount caliper. Complete brake kits will bolt directly to the **Big Ford New Style 2.50"** offset rear axle flange.

XRS4R rear brake kits are available with Wilwood's black **E-coated** proprietary **Spec37** iron alloy rotors in 12.88" or 14.00" **GTB** slotted or **SRP** drilled and slotted designs with 48 or 72, respectively, curved internal vanes for better cooling. Separate lightweight aluminum hat assemblies accommodate the internal parking brake assembly, or opt for the **EPB** (Electric Parking Brake) version with wiring harness, control unit and remote switch.

Calipers come in **gloss red** or **gloss black** powder coat, with many other color options available (additional charges apply). Stainless steel pistons and a unique square O-ring provide better heat barriers and add to the longevity of the components with increased performance and pedal feel. Brake kits include Wilwood's **BP-10** street-performance brake pads. Other compounds are available for most applications. Visit wilwood.com for more information.

XRS4R Rear Big Brake Kits for Big Ford New Style 2.50" Offset

MSRP: starts at \$2,714.00
