

**FOR IMMEDIATE PRESS RELEASE**  
**Wilwood ProMatrix SRP Rotor Kits for 1997-2006 Corvettes**

**Camarillo, CA June 2, 2010**

New from Wilwood, [ProMatrix SRP](#) series cross-drilled and face-slotted directional rotors offer a high-tech look with improved pad performance for all C5 and standard production C6 Corvettes. In addition to their aesthetic appeal and heat dissipation characteristics, the venting and cleaning action of the hole and slot pattern reduces pad glaze and minimizes any irregular pad build up on the face of the rotor. The results are smoother engagement at the pedal with improved consistency, response, and service life from the pads. All SRP rotors are cast from premium grade carbon iron and precision machined for flatness, parallelism and overall run out. A bright zinc finish is applied to reduce corrosion on areas of the rotor not cleaned by pad contact. SRP rotors can be coupled with one of several high performance Wilwood ProMatrix pad compounds to match brake response and heat resistance to all types of driving styles using the OE calipers.
