

**FOR IMMEDIATE PRESS RELEASE:  
WILWOOD'S BIG BRAKE FRONT HAT KITS FOR CAVALIER & SUNBIRD**

**Camarillo, CA June 2, 2010**

Wilwood announces front [Big Brake Kits](#) for Chevy Cavaliers and Pontiac Sunbirds ('99-04). These complete brake kits are loaded with cutting edge technology, and Wilwood's 27 year tradition of building championship winning brake systems. They are the perfect performance match with just the right look when upgrading your wheels, tires, or suspension and handling components.

Featured in these kits are race proven Forged Billet DynaPro 4- piston calipers provide big clamping power in a lightweight, rigid design. Four stainless steel pistons are used for the lowest heat transfer level of any one-piece piston design. A choice of red or black finish provides excellent corrosive resistance and long-term preservation of their high-tech style and appearance.

Braking performance is radically improved with larger 12.19" dia. disc rotors. Compared with stock rotors, brake leverage is increased by as much as 29% with the larger OD. The .810" thick, vented fined design is the perfect balance between weight and cooling area for out standing reliability and fade-free performance under the hardest braking conditions. The optional drilled and slotted SRP rotors provide a high tech look while reducing pad glaze and minimizing irregular pad buildup on the rotor face.

To complete the whole performance package, each Big Brake kit comes with Wilwood PolyMatrix "Q" compound brake pads for immediate cold response, strong resistance to fade under severe high temperatures and low dust, low noise in daily usage.
