

FOR IMMEDIATE RELEASE:

Wilwood Disc Brakes Releases Dynamic Lug-Drive Road Race Brake Kits for SN-95 Ford Mustang

Camarillo, CA • June 2022

New Wilwood Aero6R/ST lug-drive road race brake kits for the 1994-2004 Ford Mustang feature Aerolite six piston calipers and 14.00" floating rotors. Engineered explicitly for Ford SN-95 platform Mustangs in high speed road racing classes using factory spindles.

Lug-drive dynamic mounting simplifies assembly while eliminating the heat distortion of repeatedly slowing race vehicles. Differential bores in a rigid caliper evenly spread clamping force across the entire brake pad, and Thermlock® pistons provide a heat barrier between pad and fluid. Type III aluminum-oxide ceramic hard anodizing inside the caliper bores and on the surface add durability. Wilwood's proprietary **Spec37** iron alloy 14.00" SV/GT-72 rotors with staggered, directional vanes provide long wear, high friction, and high-efficiency cooling.

MSRP: starts at \$3,239.66
