

FOR IMMEDIATE RELEASE:

Wilwood Disc Brakes Releases Aero6-DM Direct-Mount Brake Kits for Jeep JK and JL Wrangler and JT Gladiator

Camarillo, CA • February 2023

Wilwood has released newly engineered direct-mount, bolt-on upgrade brake kits to increase holding power and braking performance on select late-model Jeeps. Designed to fit most 17" or larger wheels on 2007-18 Jeep JK Wrangler, 2019-21 JL Wrangler, and 2020-21 JT Gladiator. These brake kits provide more holding power and easier modulation at low speeds, and more thermal capacity for all types of high-demand highway and off-road applications.

Forged aluminum Aero6-DM six piston Aerolite direct-mount calipers have been optimized for the Jeep spindle to deliver increased clamping force. Rotors are 13.38" x 1.25" premium long-grain carbon, iron alloy, and substantially increase braking performance when paired with new Wilwood BP-"Q" ceramic-based, dual-sport SmartPad® brake pads, formulated for everyday street or performance driving. Rotors are available GT slotted or SRP drilled and slotted. Calipers are available in gloss red or black powder coat, and 22 additional colors (additional charges apply). Stainless braided Flexline kits are included.

MSRP: starts at \$1,787.50
