

FOR IMMEDIATE RELEASE:

Wilwood Disc Brakes Releases Rear Electronic Parking Brake for Upgrading Pro-Street Kits

Camarillo, CA • June 2025

Wilwood is proud to announce their popular EPB (Electric Parking Brake) kit has been engineered to retrofit rear Forged Dynalite Pro Series 12.19" rotor brake kits. Drag and Pro-Street vehicles with narrowed rear ends and wider tires make it much harder to find the space needed for optimal cable routing. This new EPB kit is the perfect solution. It simplifies installation using a wiring harness with a slim computer module that may be mounted strategically, providing more routing options, especially over steel cables.

Wilwood's Pro-Street Rear Retrofit EPB Brake kits can be ordered using EPB base part number 140-18080 to directly replace existing Wilwood MC4 mechanical parking brake or upgrade the following rear brake kits from an internal parking brake: 140-2111 through 140-2118, and 140-3018, 140-3722, 140-5236, 140-5591, 140-5746. EPB caliper finish options include high-gloss red or black powder coat or 26 additional surcharge color choices.

MSRP: starts at \$1,533.62
